With Gridlex Sky, users can manage and add customers, vendors, and items they deal with in their organization. Gridlex Sky allows users to view the balance receivables/payable, invoices/bills, receipts/payments, credit/debit notes, customer/vendor statements, and customer/vendor wise trial balance for each customer/vendor. They can view the advance and refunds for each customer/vendor wise. Furthermore, users can manage items like inventory, fixed assets, and others in a single place.

If you need any help with any feature, data migration of your old accounting data, questions on Chart of Accounts (COA) or anything at all, just email apps@gridlex.com, and our team of expert accountants will be here to help you. Remember, that one of Gridlex's core values is Customer Success. We want you to be successful.
